EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ali Imam on 14 January 2008.

2. The application has been amended as follows:

Please cancel claims 25-36.

Allowable Subject Matter

3. Claims 1-4 and 6-24 are allowed.

4. The following is an examiner's statement of reasons for allowance:

5.

The primary reason for allowance is the inclusion of the limitation "wherein the sensor arrangement comprises a sheet substrate with a closure area and an electrode area formed thereon, the substrate being bent such that the closure area and the

electrode area form said closure element and said electrode element, respectively" into claim 1, which is not found singularly or in combination within the prior art.

The closest available prior art references (Johnson et al., Nagai et al., and Rockwell et al.) disclose of electronic pen configurations using pressure sensitive sensors, however, the references singularly or in combination fail to teach of the substrate with a closure area and an electrode area formed thereon, the substrate being bent such that the closure area and the electrode area form said closure element and said electrode element, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
